

BEACH CITIES HEALTH DISTRICT

Client: Beach Cities Health District
 Location: Redondo Beach, CA
 Project Type: Mixed Use Master Planned Campus
 Services: Architecture, Land Planning
 Site Size: 11 Acres

In collaboration with Beach Cities Health District (BCHD), the former South Bay Hospital campus in Redondo Beach was reimagined. It shifted from medical offices to a preventative care-focused facility. The two-phased master plan replaced the hospital's central plant and parking structure with 420 assisted living units, a child development center, a center for health and fitness and green open space. The second phase will introduce a community wellness pavilion with flexible presentation and community meeting spaces, a demonstration kitchen and garden and more.
