

# GR&F CORPORATE OFFICE

Client: Gelfand, Rennert & Feldman  
Location: Encino, CA  
Project Type: Office Interior Design  
Services: Interiors  
Total Size: 26,000 sf

Our client needed to allow their office space to function at a whole new scale. Achieving a new density of 195 square feet per person was no easy accomplishment in the 26,000-square-foot space. Beyond enhancing the private workspace, we wanted to help employees experience their new office environment by providing various activity-based work areas. White walls with bold red accents and glass walls create a vibrant open office. Oversized bright red pivot doors allow visitors to experience the collaboration lounge, perfect for both informal and formal meetings.
