Location: Los Angeles, CA

Project Type: Commercial Office – Renovation and Interior Design

Services: Architecture, Interiors

Total Size: 68,800 sf

Office: 11,000 sf

Warehouse: 57,800 sf

Nutri-Bon selected BSB Design to convert an existing automotive supply showroom into their headquarters and warehouse facility. The design capitalized on the large volumes of the structure to create executive suites, workspaces and a warehouse, with a natural material and soothing color palette that reflects Nutri-Bon’s brand.

The exterior upgrades included new materials and a new color scheme, while the interior features private offices, open workspaces and a break room. A warm grey color scheme and soft yellow accents create a mood of relaxed sophistication.
